STANDARD IN ALL VARIANTS

CMBS Collision Mitigation Braking System

This system detects preceding cars, oncoming cars, motorbikes and pedestrians to support collision avoidance by using a front wide view camera.

LCDN Lead Car Departure Notification System

At stops such as at a traffic light, it is a function to notify the driver about the departure of a preceding car.

RDM Road Departure Mitigation System

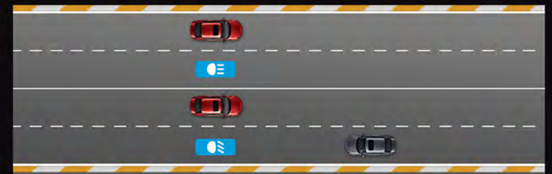
Road Departure Mitigation, or RDM System supports steering operation when the vehicle is likely to stray from the Road.

ACC Adaptive Cruise Control (Low-Speed Follow)

Adaptive Cruise Control is a support function to keep a distance with a preceding car. When driving on a highway, the system supports acceleration and braking operation to reduce load on the driver.

LKAS Lane Keeping Assist System

LKAS is a function that reduces the driver's load by supporting steering operation to keep driving along the center of a lane while driving.



AHB Auto High Beam

When the headlight control is in the AUTO position, this system automatically turns on the high beam when there are no other vehicles detected. When another vehicle is detected, the high beam is automatically switched to low
